

One schema change. A reviewable risk map in five business days.

Identify affected assets, owners, and compatibility risks before a dbt or warehouse change ships.

USD 750

fixed price

5 business days

after inputs are ready

1 change / 25 assets

read-only scope

YOU RECEIVE

Evidence, not a guess

- Blast-radius inventory for one domain and up to 25 catalog assets.
- Owner and repository-binding gaps that need human resolution.
- Consumer-by-consumer policy: migrate, preserve compatibility, or block.
- Prioritized risk register, removal-window checklist, and next-step plan.
- One 45-minute technical handoff call.

YOU PROVIDE

Minimum safe inputs

- One concrete field rename, removal, or compatible type change.
- Sanitized catalog export or agreed read-only metadata access.
- Up to three repository snapshots with affected SQL, dbt models, or contracts.
- A technical owner who can resolve evidence gaps and validate findings.

DELIVERY PATH

A bounded five-day review

DAY 0

Scope

Non-sensitive intake
